

**Julie Taylor, SLP was awarded a Cardinal Foundation grant this fall in the amount of \$1,898. With the pandemic and students choosing remote learning or needing to get teletherapy services due to Covid-19, Julie requested money to purchase speech and language digital resources to use during remote student therapy and also a touch monitor so that the digital resources could be used for in person therapy as well. Julie serves students ages 3-13 at Ell Saline with many needs including: social skills, fluency, comprehension, vocabulary, grammar, answering questions, and articulation which requires lots of different materials/resources. The students have really enjoyed the new interactive resources. Julie would like to thank Ell Saline's Cardinal Foundation for their support of speech language therapy at Ell-Saline Elementary!**
