

WebKIDSS Changes 20.21

The following change will apply if you add an IEP to the student's record. If you do not add an IEP to the student record the student's IEP will remain unchanged.

Rich Text Editor implementation was added to some WebKIDSS pages. What is Rich Text Editor? In some text boxes in Webkidss where text can be entered, you can control the appearance of your text using the rich-text editor. The rich-text toolbar has icons for editing and formatting your text. You may use the rich text editor to include images, links, as well as text.

Note: Pasting text into the rich-text editor should preserve most formatting, but some types of formatting, such as colored text, may need to be added manually in the editor after pasting.

For more information on using the Rich Text Editor in Webkidss watch the following Youtube video.
